1. Applicant is requested to submit a PTO-1449 in response to this office action including a list of all of the references made of record in the application file of US 5,792,573. Copies of the references are not needed.

2. The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

X 4. Claims 13-20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Claim 13 recites in line 7 that "one of the drive assembly and the battery having a pair of tracks defining flanges" and then in lines 8-9 that "the other of the drive assembly and the battery having grooves configured to receive the flanges of the tracks". This is incorrect because there is no support in the present specification for the battery having flanges or for the drive assembly having grooves. The specification only supports the drive assembly having the flanges and the battery having grooves.

X 5. Claims 13-20 are rejected under 35 U.S.C. 251 as being based upon new matter added to the patent for which reissue is sought. The added material which is not supported by the prior patent is as follows:

See the previous paragraph for the basis of the new matter.

Art Unit: 1745

6. Claims 1-12 are rejected under 35 USC 251 based on "lack of reissuable" error.

7. The following is an examiner's statement of reasons for allowance of the subject matter contained in claims 1-12 and 21-35: none of the prior art of record teaches the claimed rechargeable battery attached to a drive assembly wherein the assembly includes a handle portion and a battery receiving portion having a pair of tracks defining flanges. The battery further includes a releasable attachment means for attaching the battery to the assembly in a direction other than the direction of the handle portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
